Bureau d'études greisch

Cost of the works
€ 25.5 M excl. vat

Studies
1995 - 2000

Execution
1997 - 2000

0A

Cable stayed bridge for an urban motorway composed of :
- a single pylon shaped as a truncated cone and covered with glass plates,
- central cables sheathed with stainless steel,
- a prestressed concrete deck with a central box-girder and side slabs bearing on steel rods sheathed with stainless steel.

The deck is 25.7 m wide, the main span across the Meuse river is 162 m long for an overall length of 327 m.

The first part of the tunnel acts as a counterbalancing span.
