Ville de Dinant

Architect
Canevas

Cost of the works
€ 4,2 M excl. vat

Studies
2000 - 2008

Execution
2009 - 2011

AR GC TS CS

Urban square on the banks of the Meuse in the heart of the city.

The project includes an underground car park for 100 vehicles, covered by a square facing the river that can be used for shows and markets.

The car park is built in the water table and in a flood zone.

The layout of the square determines the position of the car parking spaces, the trees and the joint layout of the paving stones. It corresponds to the rhythm of the structure and the car parking spaces in the basement.

Luminous slots in the paving of the square bring natural light into the car park during the day. At night, the car park lighting brings the surface of the square to life.
