

Kemira conveyor belt at Tertre

Above the N50 road, along the Nimy-Blaton-Péronnes canal, Tertre (BE)

Mission: complete study and building supervision in civil engineering, steelwork and electromechanics

Owner
Service public Wallonie, direction des voies hydrauliques de Mons (SPW - DGO2 - DVHE - DVHM) and Port autonome du Centre Ouest (PACO)

Cost of the works
€ 560 000 excl. vat

Studies
2005 - 2006

Execution
2005 - 2006

This new conveyor for barges loading includes a completely sheltered conveyor belt and two lateral gangways.

Along the embankment, a cantilever roof (15 m high above canal level) entirely protects the loaded materials ; a vertically moveable part can be adjusted according to the ships profile.

The landscaping of the surroundings and of the RAVeL -road are also part of the mission.
