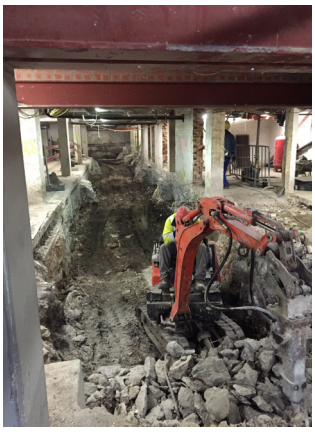
€ 850 000 for structural works

Studies
2012 - 2016

Execution
2015 - 2016

ST RV



The renovation of this building concerns:
- the deepening of an existing decor lift with underpinning,
- foundation works with jet-grouting,
- underpinning works,
- the creation of a decor gangway in the basement of the buildings on the way between the workshop located rue du Fossé aux Loups and a tunnel under the Leopold street. All existing adjoining foundations had to be underpinned and new basements to be excavated.
